**STATEMENT SUPPORTING PETITION TO MAKE SPECIAL  
UNDER M.P.E.P. § 708.02 X**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Attention: Special Program Examiner for relevant group art unit

Sir:

I declare that I am one of the applicants of application serial no. 10/817,164.

I declare that the application relates to HIV/AIDS in the following manner. The dry fluid spot (DFS) technology described in the application is applicable to HIV testing. For example, the application describes a DFS filter suitable for collecting a fluid sample from a subject, wherein the fluid sample may be dried, stored and subsequently transported to another location for the HIV testing. In this manner, a fluid sample may be taken from a subject in a resource-poor setting, i.e., a setting or location that does not have the capabilities or equipment to perform

Serial No. 10/817,164

a suitable HIV test. With the DFS filter described in the application, the dried fluid sample may be transported to a facility that is capable of performing nucleic acid amplification/detection techniques and, thus, able to determine the presence or absence of HIV in the dried fluid sample.

Thus, as the subject matter of the application contributes to the diagnosis of HIV/AIDS, expedited prosecution of the application in accordance with M.P.E.P. § 708.02 X is sought.
